I informed Cheryl about the Exide focus, and she is preparing a few things in anticipation; no need for me to participate either.

Btw, I do not plan to be there

I think Dan or John included us as an FYI

Maybe you would have more of a functional roll in such a discussion.

I think I'd find it interesting but that's about it.

I think this is something different.

Dan mentioned that this is something John Lyons put together.

As he is sitting right next to me, I asked for clarification.

It is about Exide GIS needs

dTSC is sending their IT folks. We are providing info on our how we use GIS.

Cheryl will be there .

Hi Kay -

I noticed a meeting with DTSC on the calendar tomorrow. What is the subject of that meeting? I recalled this email from 2/26 - are these related? Let me know.
Thanks.

Hi Bill

Thanks

This is helpful.

I spoke to Jim Bohon at the CUPA conference and he thought he might try to get something together at the end of March.

If I hear anything, I will be sure to reach out to you and Harry. But I expect you may get the info first and will forward it to loop Harry and I in.

I propose that the three of us get together with Bill Jones (whom I have copied here. We could do that after Guam, or perhaps next week if there is time, to discuss the Data exchange with CERS. The data is also needed for inspection filtering/support and some likely Western States SERC EO initiatives so we will need to figure out a way to synchronize our efforts internally so we are not hitting CalEPA with uncoordinated data requests from too many angles. plus we might be able to size it for all of those needs.

In addition, I believe the Enforcement division is/has worked out a data exchange process with Jims office to serve other media programs needs.

I will check with Kathleen.

can you aim to set up an internal meeting with Harry, you , me and Bill that suits your schedule. We can discuss CERS and you can brief out on the other related Data exchange and geoviewer efforts you are pursuing or are advocating at this time (e.g. hI and Guam etc)

Please let me know if you have any questions, we can also clarify further when we meet next week.

Hi Kay,

This was a suggestion during personal time by Paul while we were coordinating personal stuff (skiing!), and I concurred that it would be a good idea. I have no idea where or when or what he has in mind.... please let me know if you hear anything!

I have been attempting to work out a data service with Jim so that we don't spend contractor time each and every year putting their huge CERS data-dump into geospatial shape.... other than that, no formal comms with them.

Hi Bill

I understand there is a meeting with Cal EPA in the works with Jim Bohon and Paul Penn.

Please include me in the discussions and I would like to join you at the meeting to learn more

we are also working on the Data coordination thru the EO Along with the CUPAs, DHS and OSHA so we need to make sure our efforts are

synchronized.

Can you tell me if there is a target time frame.
